## How to become friends of Stradivari

Cremona opens its doors to the world. This is the spirit with which the Stradivari Foundation has launched the “**friends of Stradivari**” project, an international network bringing together people who possess, use or keep in custody instruments of the Cremonese classical violin making tradition, as well as people who study them, love them or just want to support the promotion and development of the violin making tradition from a cultural standpoint.

## Instruments on display
